Gold Taper-Tip Aluminum Gaffs

The slim, tapered shape of AFTCO's Taper-Tip Aluminum Gaffs makes them lightning fast in the water—easier to maneuver and deadly accurate. They're stronger and lighter too. The shafts are made from corrosion-resistant marine aluminum and they are swaged for uniform strength from end to end, but with no unnecessary weight. Available in our traditional rich gold and anodized for lasting beauty and resistance to saltwater corrosion. All models are fitted with soft but rugged black grips. Vinyl butt caps seal out corrosive moisture and prevent deck scarring. "L" indicates 3/4 inch outer diameter of tube at butt. All other models feature 1 inch outer diameter.

Available Now

White (WHT)

Black Tapered Fiberglass Gaffs

AFTCO Tapered Fiberglass Gaffs feature thick-walled, lightweight E-glass handles for extreme strength and rigidity. Each fiberglass handle is rolled on proprietary mandrels with custom tapers developed by AFTCO, then fitted with the same stainless steel hooks used on our aluminum gaffs. The gaffs feature a black epoxy finish with hand-wrapped metallic gold trim, soft yet durable black grips, and a non-slip shrink tube between the grips. A 10-inch shrink tube near the gaff head helps prevent slipping when hauling large fish over the rail.

Part Number	Color	Gaff Length	Hook Throat Width	Hook Diameter
GFF24	Black	4 ft	2 in	5/16 in
GFF34	Black	4 ft	3 in	5/16 in
GFF26	Black	6 ft	2 in	5/16 in

- A must-have for slammer or bait receiver users
- Telescopic signature AFTCO gold handle extends from 38 inches to 69.5 inches, ideal for transferring bait
- Oversized 16-inch net for easy scooping of hot baits

Available Now

Gold (GLD)

Bait Shaker

BSHAKER

- Quickly unhook bait
- Comfortable EVA handle
- Corrosion-resistant stainless steel wire
- Signature AFTCO gold shaft

Available Now

Gold (GLD)

Roller-Troller Pro

OR1P

- Features a ball bearing swivel between the release clip and halyard attachment arm
- Bearing swivel ensures the release clip stays in the correct position, reducing tangles in rigger gear
- Outrigger clip allows precise positioning of lures or bait
- Swings open cleanly when a fish strikes, ensuring a perfect line release

Available Now

Black (BLK)

Roller-Troller Outrigger Clip (2PC)

OR1

- Positions trolling lures easily from an outrigger by reeling in or letting out line through the clip
- Line rides safely on a roller with silky-smooth action
- Improved micro-tension adjustment provides sensitivity over a wide range of settings
- Precision-engineered latching system ensures consistent line release, reducing missed strikes and minimizing broken line

Available Now

Black (BLK)

Flat Line Clip

FL1

- Positions trolled lines from the stern at a lower angle to reduce tangling and improve action
- Instant strike indication when the clip snaps open to release the line
- Fitted with 135-lb coated stainless cable and a heavy-duty snap swivel

Available Now

Black (BLK)

Outrigger Release Clip

OC1

- Attaches directly to the outrigger halyard without the use of swivels
- For fixed position bait trolling, the fishing line should be twisted 5 to 10 times before hooking loop over the clip's bail
- The line may also be passed over the bail without twists to allow for adjustment of baits or lures

Available Now

Black (BLK)

Kite Clip Kit 11PC Set

KCK1

Everything needed to set up a kite fly line for fishing one or two baits. Each 11-piece set includes:

- 2 Release Clips
- 5 Kite Hooks
- 3 Barrel Swivels
- 1 Heavy-Duty Snap

Available Now

Black (BLK)

Kite Release Clip

KC1

- Same design as the Downrigger Release Clip, with a gold titanium nitride coated bail
- Includes 5 Kite Hooks
- Designed for single or multiple clip use on kite fly lines
- For single use, thread directly onto the fly line
- For multiple use, drill slider holes

Available Now

Black (BLK)

Kite Clip Attachment

KCA

- Quickly add an additional kite clip to your kite rod
- Whip a loop with floss over the kite line and attach the clip using the snap
- Eliminates the need for barrel swivels

Available Now

Black (BLK)

Kite Clip 12PC Hook Set KHOOK1

- Includes 12 non-abrasive kite hooks

Available Now

Black (BLK)

Utility Lanyard PLNYD1

- Flexible coil lanyard made from durable vinyl
- Heavy-duty swivel snaps at both ends for secure attachment
- Ideal for connecting pliers to grommets on pliers cases
- Popular with kayak anglers for securing tackle to fishing platforms

Available Now

Black (BLK)

Fish Bat FBAT2

- Molded from super-strong, corrosion-proof glass-filled polypropylene
- Triangular shape prevents rolling on deck
- Textured grip for non-slip handling
- Braided rope safety lanyard included
- Handle hook for easy hanging on railings or ladders
- 19 inches long and weighs 1.3 pounds
- Floats if dropped overboard

Big Foot® Super Heavy Duty Roller Guides

AFTCO's superb line of Big Foot® Super Heavy Duty (SHD) roller guides feature rugged, roomy frames with unequalled knot clearance. Rollers and bearings are extra large and extra tough to endure the special punishment of the heaviest line class. AFLON™, an exclusive Teflon® formulation, is bonded to all bearings to provide lasting lubrication and protection. The oversized feet are precisely formed to match the contours of rods, and they grip the rod with exceptional strength. The edges are feathered to allow winding thread to climb over the feet easily. A complete set of five includes the double roller stripper guide and two each of the two super heavy duty single-roller guides, graduated in size.

The configuration of all AFTCO Big Foot® guides is trademarked under Registration #1,615,844

Wind-On Roller Guides

AFTCO's Wind-On guide set is specifically designed to accommodate the knots and connections of wind-on leaders. The guides will handle lines from 30-lb to unlimited line class, and they have the same knot clearance as our Big Foot® guides, but in a more compact frame. They will easily handle bulky wind-on leaders up to 700-lb test and offer the ultimate in line protection and performance. Wind-On guides can be used on 30, 50 and 80-lb class IGFA rods and on extra-heavy stand-up rods. The guide feet are perfectly formed to fit blanks with tip sizes down to 12/64ths inner diameter.

The configuration of all AFTCO Wind-On guides is trademarked under Registration #1,615,844

Heavy Duty Roller Guides

AFTCO's Heavy Duty (HD) roller guides, with ample room for heavy lines and large knots, are ideal for big game trolling and deep water rods rated for 20 to 80-lb lines, and for stand-up style tuna rods up to a 130-lb test rating. Each features AFLON™ high performance bearings. Standard roller tip-tops are the perfect match for this guide series.

The configuration of all AFTCO Heavy Duty Roller Guides is trademarked under Registration #1,615,844

Regular Roller Guides

AFTCO's Regular roller guides are ideal for light line bluewater trolling, and for deep water live-bait or jigging rods rated for 16 to 50-lb lines. Each features AFLON™ high performance bearings. Standard roller tip-tops also match up with these guides.

The configuration of the AFTCO #R5 Regular Roller Guide is trademarked under Registration #1,616,853

The configuration of AFTCO #R2, #R3, #R4 Regular Roller Guides is trademarked under Registration #1,615,845

Standard Roller Tip-Tops

With universal applications for all types and standard sizes of saltwater trolling and deep water rods, our Standard roller tip-tops are equipped with our modified rollers and feature AFLON™ bearings. Designed to match up with both our Heavy Duty and Regular roller guide sets, they are available in large head (L) versions in many sizes. The "L" models offer extra knot clearance.

The configuration of AFTCO Standard Roller Tops is trademarked under Registration #1,643,711

SHD Swivel Tops

Keeps line in the center of the roller so it touches only the roller and the super hard ceramic ring in the bail, eliminating wear on the sides of the frame. Modified roller is stainless steel, with oversized diameter to minimize stress on the wire. Fitted with AFLON™ bearings.

Standard Swivel Tops

Specially designed for "lighter" wire line fishing, the articulated bail, with its ceramic ring, keeps lighter wire running on the center of the stainless roller, and keeps the wire from touching the frame. The modified #3 roller is oversized to minimize stress on the light wire, and all of the small swivel tops are fitted with AFLON™ bearings.

ROD BUILDING GUIDE

MEDIUM TACKLE

SEATS / BUTTS

Rod builders will opt for using Unibutts® in the #2, #2 Short or #2 Short Curved sizes for rods designed strictly for heavier stand-up fishing or big water trolling.

HEAVY STAND-UP TACKLE

SEATS / BUTTS

For extra heavy stand-up and trolling applications, rod builders will often opt for Unibutts® or Storabutts® in the #2, #2 Short or #2 Short Curved sizes where heavy lines are in order for giant tuna or marlin.

IGFA HEAVY TACKLE

Rods that are designed for big game fishing using any variety of 80-lb to unlimited strength monofilament or braided lines.

SEATS / BUTTS

Nothing less than AFTCO Unibutts® or Storabutts® are the professional choice for battling the biggest bluewater game fish under the most extreme conditions. Choose from #4 or #6 sizes in either straight or curved models. Knowing that curved Unibutts® or Storabutts® offer a 30% leverage advantage when pulling on huge fish from a fighting chair makes choosing the right butt easier.

We often hear from anglers and rod builders looking for advice on selecting the right roller guides and rod butts for high-performance custom rods. With so many rod blank lengths and actions available, it's not possible to cover every setup—but we've highlighted three of the most popular rod types and provided guidelines to help point builders in the right direction.

GUIDES / TOPS

AFTCO Heavy-Duty guides are generally recommended for stand-up rods designed for use with 30 to 100-lb test lines of all types. AFTCO regular guides are the best choice for lighter action rods built for use with 30 to 50-lb test lines. AFTCO regular tip-tops will work for most applications, being mindful that large head tip-tops are a better choice where leadered lines might require slightly more rod clearance at the rod tip.

GUIDES / TOPS

AFTCO Wind-On roller guides are the best choice when building rods where heavy leaders are being used in extreme bluewater conditions. For such applications, AFTCO Heavy-Duty tip-tops should be the ideal match for these guides.

GUIDES / TOPS

AFTCO Super Heavy-Duty roller guides have long been a favorite choice to max out the performance potential of the heaviest rods when fighting the biggest fish under the most extreme conditions. AFTCO Super Heavy-Duty tip-tops should be the ideal match for SHD guides when fishing heavy lines and leaders for giant marlin, tuna and sharks. Where maximum knot clearance and added strength are paramount, the ultimate choice is AFTCO SXHD roller guides matched with SXHD tip-tops

Unibutts®

The one-piece Unibutt® aluminum butt and reel seat is "unitized" for maximum strength and minimum weight. The aligning pin-plug, gimbal and fixed hood are locked in permanent alignment so that gimbal, reel and rod guides always line up perfectly. The ferrules are precision-machined to ensure complete interchangeability of rod tip sections, and an O-ring on the ferrule prevents corrosion between ferrule and reel seat. A Teflon™ ring inside the collet nut assures a snug fit, prevents galling and allows easy removal of the nut. **Note:** If ordering replacements for existing rods, all Unibutts® and Storabutts® are available without ferrule and collets nuts.

The configuration of AFTCO Unibutts® is trademarked under Registration #2,082,683

Unique two-piece unit offers the advantage of separating the reel seat from the butt section for easy storage

Storabutts®

The AFTCO Storabutt® has all of the characteristics of the AFTCO Unibutt®, but with the advantage of being able to separate the reel seat from the rod butt for easy storage. The reel seat is ferruled at both ends to permit removal of the butt section of your rod without having to also remove your reel, which would otherwise disturb your terminal tackle. This makes it easier to store rods, particularly those with curved butts, on boats where storage space is limited. The Storabutt® is available in either curved or straight models for 50-lb to 130-lb class rods.
